To Whom It May Concern:

As an Associate at Fullerton Diaz Architects, I am pleased to be able to recommend a talented professional, Diana Ramirez. I have worked closely with Diana as one of her immediate supervisors and mentor for almost three years and I was very impressed with her work and growth.

As a young aspiring member of our Firm, her work was mostly concentrated in preparing schematic design visuals utilizing the Sketch-up program. Diana has not only been an integral part of our design team, but she has also worked very closely in our marketing efforts by preparing various graphic designs and exhibits used in many of our brochures.

It is unbearably sad for us all to let Diana go, but given the unfortunate economic climate, no other option was available other than to see her move on. I whole heartedly would without any reservation recommend Diana to you. I trust she will be a tremendous asset to your Firm, as she was to ours. She will definitely be missed.

Best Regards,
