To Whom It May Concern:

Diana Ramirez has been a valued FDA team member for the last three years. She is tremendously respected here and it is with great regret that the economic downturn has forced this separation.

Diana is uniquely gifted in her ability to illustrate with sketch up. Not only does she use the program as a tool very well, she also has great ability to visualize in 3D and has a strong architectural sense. Not all people who study or practice architecture have the innate ability to visualize and bring to life concepts the way that she does.

Diana is also a very serious, dedicated employee. She has perfect attendance, always meets her deadlines and remains steadily on task.

We cannot praise Diana enough. This is truly a loss to our firm, but if you have the opportunity to hire her, we strongly encourage you do so. Please feel free to call or email me (jshields@FDArchitects.com) if you have any questions.

Sincerely,

FULLERTON DIAZ ARCHITECTS
